

Fix the operating systems behind decisions, documents, workflows, and security.

TechEccentric is an Africa-focused analytics, AI, and cybersecurity consulting firm for organizations where bad reports, document backlogs, or weak controls create real risk.

100+ agencies

Analytics and AI leadership on U.S. state modernization work serving millions of sessions.

1,500+ endpoints

Managed detection and response delivered for 15+ organizations in live MSSP environments.

25+ years

Energy, geoscience, stakeholder strategy, project governance, and public affairs experience.

WHAT WE ARE HIRED TO FIX

Analytics And Managed Reporting

KPI design, governance, dashboards, recurring reporting, and leadership review cadence.

AI And Machine Learning

Agentic AI, RAG, custom LLM deployment, fine-tuning, predictive models, and MLOps.

Automation And Document Intelligence

AI workflow automation, document ingestion, extraction, validation queues, and handover.

Cybersecurity

Hardening, penetration testing, incident response, and compliance automation.

HOW ENGAGEMENTS START

Operating Diagnostic

Focused review of reports, workflows, documents, security posture, access, and owners.

Implementation Sprint

A scoped build around one dashboard, workflow, document queue, or control gap.

Pilot Or Retainer

Recurring support where the evidence proves value and leadership wants operating rhythm.

Diagnostic call

Send the recurring report, workflow, document queue, or security exposure first.
